

Homework 2  
Graduate Requirement  
RUID 179004965

- Camera Function: The camera functionality was implemented.
- Initially a default icon is displayed on the Image View. On clicking the Head icon the Contact Details Fragment, while adding a new contact, the camera application opens and the user can click the image. The image is displayed in the Image View in the Contact Details fragment.
- On adding the contact, This image is Saved to the “Test Folder” directory in the Root Directory.
- The image is saved with the name of the contact as the filename.
- Based on the contact name clicked the Contact Profile Fragment opens up, this name is used to get the image of the contact and is displayed on the Image View in the Fragment.
